RUSH — TIME DATED

TODAY & TOMORROW

(Newsbriefs continued)

Applications are now being accepted by the American Heart Association, S.F. Chapter for a $4,800 award that will fund an innovative community service project, which must be conducted within the City and County of S.F. during July, 1980 to June 1981. The project must be designed to promote an awareness of and contribute to the prevention and treatment of cardiovascular disease in S.F.

The memorial fund honors Robert L. Biben, a past president of San Francisco Heart.

Applications must be submitted by March 3. For further information contact Programs Department, American Heart Association, S.F. Chapter, 421 Powell Street, S.F., CA 94102, (415) 433-2273.

Sixteen UCSF faculty members presented papers at the American Association for the Advancement of Science (AAAS) meetings, January 3-8. They were: Gert H. Brieger, History of the Health Sciences; Gordon Crippen, Peter Kollman, Irwin Kuntz, Robert Langridge, Pharmaceutical Chemistry; Hans Elias, Charles J. Epstein, Pediatrics; John Gofman, Medicine; Edward Green, Periodontology; Christine Guthrie, Biochemistry & Biophysics; Gail R. Martin, Roger A. Pedersen, Anatomy; Theodore L. Phillips, Radiation Oncology; Sol Silverman, Jr., Oral Medicine and Hospital Dentistry; Steven J. Silverstein, Samuel J. Wycoff, General Dentistry. Elias, Pedersen and Wycoff were also chairmen of three of the symposia.

How young children identify with their own sex will be one of the subjects discussed in a weekend UCSF symposium entitled, "The Health of the Young and the Development of Gender," to be held at the S.F. Sheraton Palace Hotel, Saturday and Sunday, February 9 and 10.

The symposium will also discuss adolescent antisocial behavior and depression, early recognition of symptoms, and strategies for dealing with them. Speakers include: Carol Bohmer, professor, Medical Psychiatry, Johns Hopkins University; Mary Calderone, president, U.S. Sex Information and Education Council; Evalyn Gendel, director, UCSF Human Sexuality Program; and Milton Diamond, professor, Anatomy and Physiology, University of Hawaii.

General admission is $115 - $50 for fulltime students with verification letter. Advance registration is strongly advised. For registration and further information call x2894.

Werner Henle, the discoverer of the cause of mononucleosis, will present the Annual Brainerd Memorial Lecture at SFGH on Thursday, February 14 at 11 a.m., in the Pathology Auditorium. His topic will be "Virology and Pathogenicity of Infectious Mononucleosis."

Henle, who is director of the Division of Virology of the Joseph Stokes, Jr. Research Institute at Children's Hospital of Philadelphia, also will speak at Medical Grand Rounds at UCSF on Wednesday, February 13, at 10:30 a.m., in Cole Hall.

The Brainerd Lecture honors the late Henry D. Brainerd, former chairman of the UCSF Department of Medicine and chief of SFGH Medical Service.

NEWS BRIEFS

Karl J. Kittelman, Ph.D., has been appointed assistant vice chancellor, Academic Affairs. An acting associate dean of Academic Affairs and associate professor, Biochemistry at the University of Massachusetts Medical School, Hittelman received his degree in physiology from UCLA.

Hittelman will serve as liaison with academic service units and Academic Senate committees and will have responsibility for instructional projects, academic affirmative action program, committee reviews for regulatory agencies and provide leadership for academic program planning and unit evaluation.

Thomas A. Rolinson has been appointed associate administrative vice chancellor, taking the place of Arthur Gillis. Rolinson has been associate dean for administration at the College of Medicine at UC-Irvine since 1973.

Rolinson will be responsible for coordination of campus planning, resource allocation, operating and capital budgets, and line responsibility for facilities, development and construction programs. Both appointments were effective February 1.

Three UCSF students have been awarded grants from the ARCS (Achievement Rewards for College Scientists) Foundation, Inc., Northern California Chapter, in the total amount of $9,000. The recipients are: Michael Gibson and Douglas Buckley from the Hormone Research Laboratory, under the direction of Choh Hao Li; and Diane Figlewicz from the Matabolic Research Unit, under the direction of Gerold M. Grodsky.

The awards will be given at the Foundation's scholarship luncheon on March 11, at the St. Francis Hotel.

The ARCS Foundation is a women's organization created specifically to provide scholarship or fellowship support to outstanding college and university students.

All UC employees whose work involves federal contracts and grants will have to make regular reports accounting for how they spend their University time, beginning July 1.

The new controversial reporting regulation, mandated by the Department of Health, Education, and Welfare, is known as Office of Management and Budget Circular A-21. It requires academic, professional and staff employees in colleges and universities who are involved in federally-supported projects to complete reports periodically, estimating efforts by percentage of time in the following categories: instruction, research, public service, and administration.

According to UC officials, the new stricter requirements have been imposed because of growing federal concern about overhead rate increases and uniformity of reporting practices.

Educational associations, led by the Association of American Universities and the Committee on Governmental Relations of the National Association of College and University Business Officers, argued against the change. UC President David Saxon and many other university presidents participated actively in an attempt to convince federal officials - to no avail - that the type of reporting HEW wanted was not realistic in an academic environment.

The new rules began taking form in 1975, when HEW, which is responsible for auditing federal contracts and grants from most of the nation's universities and colleges, proposed a major revision in the federal regulations governing such projects.

All users of card-operated photocopy machines in the Library are reminded to bring their cards to 285 HSE to be re-notched to fit the newly changed machines. This applies only to Infortext cards issued by the Library.

Nominations are being sought for the Chancellor's Award for Public Service. UCSF faculty members, students and staff employees who have performed outstanding service to the campus and/or to the community at large are eligible for nomination for the Award.

Three awards are made each year, two of which are for $500 each. A third award of $600 has been designated as the "Thomas N. Burbridge Public Service Award," the additional $100 given annually by the UCSF Black Caucus.

Candidates for the awards should demonstrate outstanding public service beyond the scope of their normal job duties. Candidates for the Burbridge Award should demonstrate particular contributions to equal education and employment opportunity and to social justice. The awards will be presented at a campus ceremony in May.

Nomination forms are available in the Chancellor's Office, 126 S. Deadline for nominations is March 15.

The UC Retirement System Board is seeking nominations for a representative who is not a member of the Academic Senate. Deadline is Monday, March 31.

Candidates are nominated by petition of at least 50 non-Senate UCRS members. Any non-Senate employee who is a member of the basic UCRS plan is eligible for nomination. Petitions are available in the Personnel Department, U-64.

The UCRS Board, which advises the President on matters concerning UCRS, consists of nine members: two ex-officio; three appointed by the President subject to Regents' approval; two selected by the Academic Senate; and two by non-Senate members of UCRS. UCRS regulations state that the two non-Senate members be from two different UC locations. One has already been chosen from Lawrence Livermore Laboratory.

Ballots will be mailed to all non-Senate members during June. For further information call x1843.

Requests are due by Friday, February 15 for the 1979 Service Awards. All departments are urged to submit requests to the Personnel Office, Personnel Assistants, U-12, for those employees qualifying during the January 2, 1979 to January 2, 1980 period.

Service Award Requests are submitted by departments on a continuing basis throughout the calendar year. It is necessary to complete Form 174039 Staff Service Award Request for each employee eligible for a Service Award.

Eight UCSF researchers have received grants from the American Cancer Society totaling $448,313. John W. Sedat, assistant professor, Biochemistry and Biophysics, was awarded $100,000 to help provide information on gene regulation and replication in cells.

Harold E. Varmus, professor, Microbiology, has received $90,000 to further his studies on the biochemical aspects of *Rous Sarcoma* virus. Takao Hoshino, associate professor, Neurosurgery received $82,223 for studies leading to the more effective selection of drugs used in chemocherapy. Ashley T. Haase, associate professor, VA Medical Center, Medicine and Microbiology, received $60,000 for continued work in the area of immunology. A $50,000 grant is enabling Sondra G. Barrett, adjunct professor, Radiation Oncology, to continue her work in the field of leukemia research; and three postdoctoral fellowships have been awarded to Jerry M. Kuner, Douglas Jane Forbes, and Louise Wood Liao.

Stop-smoking clinics for people with heart or lung disease who have been told they must quit by their physicians are offered at the Habit Abatement Clinic, a part of LPPI, located at 1490-5th Ave.

Long-time smokers with health problems need special support to quit the habit. The UCSF clinic is part of a research project to find the most effective ways to motivate such people to give up cigarettes. The program costs $75, one-third of which is refunded after a six-month follow-up.

To join the program or find out more information call x7-453.

Nine students from the Allied Medical Program, sponsored by the S.F. Unified School District, are volunteering their services at the UCSF Hospitals and Clinics. The students are participating in various units assisting in direct patient services and learning about the general field of health care and health careers through weekly classes.

The S.F. Unified School District coordinators of the project are John O'Connor and Ruth Taylor. Students are Girley Corpus, Brenda Kwon, Elizabeth Matias, Wanda Smith, Pauline Tseng, Lynette Johnson, Meg Hudson, Victoria Foreman and Corazon Nirona.
